Project
Coordinator

Recent Projects

UW Health Eastpark Medical Center

The 7 story, 469,000 sf facility includes many specialties including Integrated Specialty Care for Women, Adult Cancer Care, Proton Therapy Center, Imaging, Laboratory Services, and Innovative Clinical trials.

UK HealthCare Cancer and Ambulatory Surgery Center

The 260,000 sf facility includes multiple Specialty Clinics, Infusion, Urgent Care, Radiation Therapy, and an Ambulatory Surgery Center. Several support departments include multiple Imaging modalities, Pharmacy, Lab, Physical Therapy, and Sterile Processing.

Cincinnati Children's Eastgate MOB

The 110,000 sf facility includes outpatient medical and surgical specialty clinics, occupational and physical therapy, speech therapy, audiology services, and ophthalmology as well as intensive outpatient programs for mental health. The facility will also include a laboratory along with a pharmacy, X-ray, and MRI services.

Healthcare Technology

Radiation Oncology systems continue to evolve by combining scanning, treatment, and AI technologies. Examples include combining Linear Accelerators with scanners such as MRI or PET. These systems are often larger and heavier than past equipment and require increased space and weight considerations. They continue to require dedicated treatment rooms; however, they may also require additional dedicated electrical, cooling, and ventilation systems to support operation. Walsh consultants continue to expand our understanding of new technology and are available to assist with questions you may have regarding new equipment's impact on planning and construction.

Walsh Technology

Our proprietary medical equipment planning system and punch list app continue to evolve each year. Recent innovative updates include increased procurement tools for tracking, visual upgrades for greater inventory detail, and increased project search capabilities to better meet client standards across multiple projects. We have also continued to increase speed for overall efficiency and generating client reports. If you are interested in learning more, please let us know.
